**Security vs. Access: Balancing Safety and Productivity in the Digital School** LeAnne Robinson, Abbie Brown, Timothy D. Green

'Better safe than sorry' isn't always as simple as it sounds. Security threats from the Internet and other technologies are very real, and schools have an obligation to keep their students, staff, and property safe, but implementing drastic security measures can often create an environment of fear and significantly reduce teachers ability to provide students with a high-quality education. Overly cautious security measures often have unintended consequences. Disabling USB ports may prevent data theft, but it also inhibits collaboration. Strict copyright guidelines can prevent lawsuits but may also preclude teachers from legally using digital video that enhances a lesson or helps a student grasp an otherwise elusive concept.

Security vs. Access emphasizes the importance of balance in creating school environments that are safe and productive. The book provides educators, administrators, and IT staff the information they need to have constructive conversations about security challenges while still making sure students receive an effective, technology-infused education. The authors examine security issues, including access to inappropriate content, network security, and identity theft. They discuss common responses and provide realistic recommendations that address both safety and access. Educators will find this book invaluable as they engage in a critical dialogue with all stakeholders, promoting knowledge, education, and communication over security responses that stifle teaching and learning.

Topics include:

- online safety
- network safety
- productivity
- school network

The International Society for Technology in Education (ISTE) is the trusted source for professional development, knowledge generation, advocacy and leadership for innovation. ISTE is the premier membership association for educators and education leaders engaged in improving teaching and learning by advancing the effective use of technology in PK-12 and teacher education. Home of the National Educational Technology Standards (NETS), the Center for Applied Research in Educational Technology (CARET), and ISTE's annual conference (formerly known as the National Educational Computing Conference, or NECC), ISTE represents more than 100,000 professionals worldwide. We support our members with information, networking opportunities, and guidance as they face the challenge of transforming education.

Some of the areas in which we publish are:

- Web. 2.0 in the classroom-RSS, podcasts, and more
- National Educational Technology Standards (NETS)
- Professional development for educators and administrators
- Integrating technology into the classroom and curriculum
- Safe practices for the Internet and technology
- Educational technology for parents
