Lubricants are essential in engineering, however more sustainable formulations are needed to avoid adverse effects on the ecosystem. Bio-based lubricant formulations present a promising solution. Biolubricants: Science and technology is a comprehensive, interdisciplinary and timely review of this important subject.

Initial chapters address the principles of lubrication, before systematically reviewing fossil and bio-based feedstock resources for biodegradable lubricants. Further chapters describe catalytic, (bio) chemical functionalisation processes for transformation of feedstocks into commercial products, product development, relevant legislation, life cycle assessment, major product groups and specific performance criteria in all major applications. Final chapters consider markets for biolubricants, issues to consider when selecting and using a lubricant, lubricant disposal and future trends.

With its distinguished authors, Biolubricants: Science and technology is a comprehensive reference for an industrial audience of oil formulators and lubrication engineers, as well as researchers and academics with an interest in the subject. It provides an essential overview of scientific and technological developments enabling the cost-effective improvement of biolubricants, something that is crucial for the green future of the lubricant industry.

- A comprehensive, interdisciplinary and timely review of bio-based lubricant formulations
- Addresses the principles of lubrication

Well, probably you will require this Biolubricants: Science and Technology (Woodhead Publishing Series in Energy).

Diane Williams:

Reading a book for being new life style in this calendar year; every people loves to learn a book. When you study a book you can get a lot of benefit. When you read books, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what types of book that you have read. In order to get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, this sort of us novel, comics, as well as soon. The Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) will give you new experience in reading a book.

Mavis Strain:

Beside this particular Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) in your phone, it may give you a way to get closer to the new knowledge or data. The information and the knowledge you are going to got here is fresh from your oven so don't possibly be worry if you feel like an previous people live in narrow town. It is good thing to have Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) because this book offers for your requirements readable information. Do you at times have book but you would not get what it's facts concerning. Oh come on, that will not happen if you have this in the hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Use you still want to miss the idea? Find this book and also read it from right now!
