Next Generation Wireless Communications Using Radio over Fiber

Nathan J. Gomes, Paulo P. Monteiro, Atilio Gameiro

Next Generation Wireless Communications Using Radio over Fiber Nathan J. Gomes, Paulo P. Monteiro, Atilio Gameiro

Taking a coherent and logical approach, this book describes the potential use of co-ordinated multipoint systems supported by radio over fiber. It covers an impressive breadth of topics, ranging from components, subsystem and system architecture, to network management and business perspectives. The authors show the importance of radio over fiber in eliminating or mitigating against the current, perceived barriers to the use of co-ordinated multipoint, and the drivers for standardisation activities in future mobile/wireless systems over the next few years.

The book brings together the system concept for centralized processing, including what is required for co-existence with legacy wireless systems, the algorithms that can be used for improving wireless bandwidth utilization at physical and MAC layers and the radio over fiber network and link design necessary to support the wireless system. Other important research is also covered as the authors look at compensating for radio over fiber impairments and providing simple network management functions. A study of service provision and the business case for such a future wireless system is also fully considered.

This book comes at an important time for future wireless systems with standardization of fourth generation wireless systems still ongoing. The content enables readers to make key decisions about future standardisation and their own research work. The business analysis also makes the book useful to those involved in deciding the future directions of telecoms organisations. This information will be core to their decision-making as it provides technical knowledge of the state-of-the-art but also system level assessments of what is possible in a business environment.

From reader reviews:

Jennifer Mitchell:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Sure, you can choose the suitable activity regarding spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the actual Mall. How about open as well as read a book entitled Next Generation Wireless Communications Using Radio over Fiber? Maybe it is for being best activity for you. You recognize beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have some other opinion?

Jeffrey Messina:

This Next Generation Wireless Communications Using Radio over Fiber book is not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is usually information inside this publication incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. This kind of Next Generation Wireless Communications Using Radio over Fiber without we understand teach the one who reading it become critical in pondering and analyzing. Don't be worry Next Generation Wireless Communications Using Radio over Fiber can bring any time you are and not make your handbag space or bookshelves' become full because you can have it inside your lovely laptop even phone. This Next Generation Wireless Communications Using Radio over Fiber having great arrangement in word in addition to layout, so you will not experience uninterested in reading.

Wayne Robinson:

As people who live in often the modest era should be revise about what going on or details even knowledge to make these individuals keep up with the era which is always change and move forward. Some of you maybe can update themselves by reading through books. It is a good choice to suit your needs but the problems coming to a person is you don't know what type you should start with. This Next Generation Wireless Communications Using Radio over Fiber is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

Gerard Norman:

Reading a book make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is composed or printed or outlined from each source that filled update of news. In this modern era like now, many ways to get information are available for an individual. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just searching for the Next Generation Wireless Communications Using Radio over Fiber when you desired it?
