Text Mining: Applications and Theory

Text Mining: Applications and Theory

Text Mining: Applications and Theory presents the state-of-the-art algorithms for text mining from both the academic and industrial perspectives. The contributors span several countries and scientific domains: universities, industrial corporations, and government laboratories, and demonstrate the use of techniques from machine learning, knowledge discovery, natural language processing and information retrieval to design computational models for automated text analysis and mining.

This volume demonstrates how advancements in the fields of applied mathematics, computer science, machine learning, and natural language processing can collectively capture, classify, and interpret words and their contexts. As suggested in the preface, text mining is needed when “words are not enough.”

This book:

- Provides state-of-the-art algorithms and techniques for critical tasks in text mining applications, such as clustering, classification, anomaly and trend detection, and stream analysis.
- Presents a survey of text visualization techniques and looks at the multilingual text classification problem.
- Discusses the issue of cybercrime associated with chatrooms.
- Features advances in visual analytics and machine learning along with illustrative examples.
- Is accompanied by a supporting website featuring datasets.

Applied mathematicians, statisticians, practitioners and students in computer science, bioinformatics and engineering will find this book extremely useful.

From reader reviews:

Paul McKinney:

Book is to be different for every single grade. Book for children till adult are different content. As it is known to us that book is very important usually. The book Text Mining: Applications and Theory had been making you to know about other knowledge and of course you can take more information. It is very advantages for you. The book Text Mining: Applications and Theory is not only giving you far more new information but also to get your friend when you sense bored. You can spend your spend time to read your reserve. Try to make relationship while using book Text Mining: Applications and Theory. You never experience lose out for everything in case you read some books.

Cleveland Bolton:

Reading a book to get new life style in this 12 months; every people loves to read a book. When you examine a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, mainly because book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you would like get information about your examine, you can read education books, but if you want to entertain yourself read a fiction books, these kinds of us novel, comics, in addition to soon. The Text Mining: Applications and Theory will give you new experience in examining a book.

Eva Ammons:

You can get this Text Mining: Applications and Theory by look at the bookstore or Mall. Simply viewing or reviewing it can to be your solve trouble if you get difficulties on your knowledge. Kinds of this book are various. Not only through written or printed but also can you enjoy this book simply by e-book. In the modern era similar to now, you just looking because of your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose correct ways for you.

Sang Weems:

Reading a guide make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is prepared or printed or created from each source this filled update of news. On this modern era like currently, many ways to get information are available for anyone. From media social including newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just looking for the Text Mining: Applications and Theory when you essential it?
