## **Electron-Phonon Interaction in Conventional and Unconventional Superconductors (Springer Theses)**

Pegor Aynajian

The problem of conventional, low-temperature superconductivity has been regarded as solved since the seminal work of Bardeen, Cooper, and Schrieffer (BCS) more than 50 years ago. However, the theory does not allow accurate predictions of some of the most fundamental properties of a superconductor, including the superconducting energy gap on the Fermi surface. This thesis describes the development and scientific implementation of a new experimental method that puts this old problem into an entirely new light. The nominee has made major contributions to the development and implementation of a new experimental method that enhances the resolution of spectroscopic experiments on dispersive lattice-vibrational excitations (the "glue" responsible for Cooper pairing of electrons in conventional superconductors) by more than two orders of magnitude. Using this method, he has discovered an unexpected relationship between the superconducting energy gap and the geometry of the Fermi surface in the normal state, both of which leave subtle imprints in the lattice vibrations that could not be resolved by conventional spectroscopic methods. He has confirmed this relationship on two elemental superconductors and on a series of metallic alloys. This indicates that a mechanism qualitatively beyond the standard BCS theory determines the magnitude and anisotropy of the superconducting gap.

### **From reader reviews:**

#### **John Herrera:**

What do you about book? It is not important along with you? Or just adding material when you want something to explain what yours problem? How about your free time? Or are you busy man? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have time? What did you do? All people has many questions above. They have to answer that question simply because just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is suitable. Because start from on guardería until university need this specific Electron-Phonon Interaction in Conventional and Unconventional Superconductors (Springer Theses) to read.

#### **Mary Benoit:**

Here thing why this specific Electron-Phonon Interaction in Conventional and Unconventional Superconductors (Springer Theses) are different and reliable to be yours. First of all examining a book is good nevertheless it depends in the content of computer which is the content is as yummy as food or not. Electron-Phonon Interaction in Conventional and Unconventional Superconductors (Springer Theses) giving you information deeper since different ways, you can find any publication out there but there is no e-book that similar with Electron-Phonon Interaction in Conventional and Unconventional Superconductors (Springer Theses). It gives you thrill studying journey, its open up your own eyes about the thing that will happened in the world which is probably can be happened around you. It is easy to bring everywhere like in area, café, or even in your way home by train. When you are having difficulties in bringing the imprinted book maybe the form of Electron-Phonon Interaction in Conventional and Unconventional Superconductors (Springer Theses) in e-book can be your alternate.

#### **Lena Stubbs:**

Are you kind of busy person, only have 10 or 15 minute in your day time to upgrading your mind expertise or thinking skill also analytical thinking? Then you are receiving problem with the book as compared to can satisfy your short space of time to read it because all this time you only find guide that need more time to be study. Electron-Phonon Interaction in Conventional and Unconventional Superconductors (Springer Theses) can be your answer as it can be read by anyone who have those short extra time problems.

#### **Louis Chavez:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that question was given by teacher for their students. Many kinds of hobby, All people has different hobby. And also you know that little person such as reading or as studying become their hobby. You need to understand that reading is very important in addition to book as to be the factor. Book is important thing to provide you knowledge, except your current teacher or lecturer. You will find good news or update concerning something by book. Different categories of books that can you go onto be your object. One of them is Electron-Phonon

Interaction in Conventional and Unconventional Superconductors (Springer Theses).
