In biology, the Lazarus Effect refers to species and other organisms that appeared in one time period and then disappeared; only to reappear at a later period of time. Biologists were amazed at how a species could be alive and well at a certain time and then seemingly go extinct. Then, this "extinct" species somehow comes back to life and reproduces. Biologists used the term Lazarus Effect based upon the New Testament account of Jesus miraculously raising His friend Lazarus from the dead. In this book, learn how you can experience a Lazarus Effect in your personal life.
