High Frequency Over-the-Horizon Radar: Fundamental Principles, Signal Processing, and Practical Applications Dr. Giuseppe Fabrizio

THE MOST COMPLETE GUIDE TO HIGH FREQUENCY OVER-THE-HORIZON RADAR SYSTEMS

Written by a leading global expert on the topic, *High Frequency Over-the-Horizon Radar* provides in-depth coverage of the signal processing models and techniques that have significantly advanced OTH radar technology. This pioneering work describes the fundamental principles of OTH radar design and operation, and then delves into the mathematical modeling of HF signals received by actual OTH radar systems based on experimental data analysis. Numerous examples illustrate the practical application of modern adaptive signal processing techniques to real and simulated OTH radar data.

This authoritative text covers skywave and surface-wave systems and is an invaluable resource for researchers, engineers, and practitioners working with OTH radar systems and technologies.

Key Features:

- Offers a thorough and accurate treatment of essential concepts ranging from system design and operation, through to signal processing methods, and their practical application.
- Provides clear explanations of fundamental principles for scientists, engineers, students, practitioners, technicians, managers, and other professionals starting out in this field.
- Offers a detailed coverage of theoretical and applied signal-processing concepts and techniques that have become a cornerstone for the effective operation of real-world OTH radar systems.
- Fills a long-standing void in the contemporary OTH radar literature with over 350 illustrations (color figures available for download), and over 500 references.

From reader reviews:

Daniel Gutierrez:

Book is definitely written, printed, or descriptive for everything. You can know everything you want by a publication. Book has a different type. To be sure that book is important factor to bring us around the world. Next to that you can your reading proficiency was fluently. A publication High Frequency Over-the-Horizon Radar: Fundamental Principles, Signal Processing, and Practical Applications will make you to possibly be smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think this open or reading a new book make you bored. It is not make you fun. Why they may be thought like that? Have you in search of best book or appropriate book with you?

Alfred Leahy:

Now a day those who Living in the era wherever everything reachable by interact with the internet and the resources in it can be true or not call for people to be aware of each information they get. How people have to be smart in having any information nowadays? Of course the reply is reading a book. Looking at a book can help people out of this uncertainty Information mainly this High Frequency Over-the-Horizon Radar: Fundamental Principles, Signal Processing, and Practical Applications book as this book offers you rich data and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you may already know.

Robert Eslinger:

Playing with family inside a park, coming to see the marine world or hanging out with good friends is thing that usually you might have done when you have spare time, after that why you don't try point that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love High Frequency Over-the-Horizon Radar: Fundamental Principles, Signal Processing, and Practical Applications, it is possible to enjoy both. It is fine combination right, you still would like to miss it? What kind of hangout type is it? Oh can happen its mind hangout fellas. What? Still don't get it, oh come on its named reading friends.

Patrick Austin:

On this era which is the greater person or who has ability to do something more are more treasured than other. Do you want to become one among it? It is just simple solution to have that. What you have to do is just spending your time not very much but quite enough to enjoy a look at some books. On the list of books in the top record in your reading list is High Frequency Over-the-Horizon Radar: Fundamental Principles, Signal Processing, and Practical Applications. This book which can be qualified as The Hungry Hillside can get you closer in becoming precious person. By looking upwards and review this publication you can get many advantages.
