Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) Liana Stanescu, Dumitru Dan Burdescu, Marius Brezovan, Cristian Gabriel Mihai

Creating New Medical Ontologies for Image Annotation focuses on the problem of the medical images automatic annotation process, which is solved in an original manner by the authors. All the steps of this process are described in detail with algorithms, experiments and results. The original algorithms proposed by authors are compared with other efficient similar algorithms. In addition, the authors treat the problem of creating ontologies in an automatic way, starting from Medical Subject Headings (MESH). They have presented some efficient and relevant annotation models and also the basics of the annotation model used by the proposed system: Cross Media Relevance Models. Based on a text query the system will retrieve the images that contain objects described by the keywords.

From reader reviews:

Fernando Rowe:

Book is to be different per grade. Book for children until adult are different content. To be sure that book is very important for us. The book Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) was making you to know about other know-how and of course you can take more information. It is rather advantages for you. The book Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) is not only giving you more new information but also to get your friend when you really feel bored. You can spend your spend time to read your publication. Try to make relationship with all the book Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering). You never truly feel lose out for everything should you read some books.

Gemma Jackson:

Here thing why that Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) are different and trustworthy to be yours. First of all reading a book is good but it depends in the content of the usb ports which is the content is as delicious as food or not. Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) giving you information deeper as different ways, you can find any e-book out there but there is no reserve that similar with Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering). It gives you thrill studying journey, its open up your own eyes about the thing this happened in the world which is possibly can be happened around you. You can actually bring everywhere like in area, café, or even in your means home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) in e-book can be your alternative.

Andrew Nixon:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to pick book like comic, limited story and the biggest the first is novel. Now, why not seeking Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) that give your enjoyment preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the means for people to know world considerably better then how they react in the direction of the world. It can't be mentioned constantly that reading habit only for the geeky person but for all of you who wants to end up being success person. So , for every you who want to start reading as your good habit, you may pick Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) become your own starter.

Roger Hodge:

As a college student exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some guide, they are complained. Just minor students that has reading's heart and soul or real their passion. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Creating New Medical Ontologies for Image Annotation: A Case Study (SpringerBriefs in Electrical and Computer Engineering) can make you truly feel more interested to read.
