Physics in a Mad World M Shifman

This book tells captivating stories of misadventures of two renowned theoretical physicists in the Soviet Union. The first part is devoted to Friedrich (Fritz) Houtermans, an outstanding Dutch–Austrian–German physicist who was the first to suggest that the source of stars' energy is thermonuclear fusion, and also made a number of other important contributions to cosmochemistry and geochemistry. In 1935, Houtermans, a German communist, in an attempt to save his life from Hilter's Gestapo, fled to the Soviet Union. He took up an appointment at the Kharkov Physico-Technical Institute, working there for two years with the Russian physicist Valentin P Fomin. In the Great Purge of 1937, Houtermans was arrested in December by the NKVD (Soviet Secret Police, KGB's predecessor). He was tortured, and confessed to being a Trotskyist plotter and German spy, out of fear of threats against his wife Charlotte. However, Charlotte had already escaped from the Soviet Union to Denmark, after which she went to England and finally the USA. As a result of the Hilter–Stalin Pact of 1939, Houtermans was turned over to the Gestapo in May 1940 and imprisoned in Berlin.

The second part consists of two essays that narrate the life story of Yuri Golfand, one of the codiscoverers of supersymmetry, a major discovery in theoretical physics in the 20th century. In 1973, just two years after the publication of his seminal paper, he was fired from the Lebedev Physics Institute in Moscow. Because of his Jewish origin he could find no job. Under such circumstances, he applied for an exit visa to Israel, but his application was denied. Yuri Golfand became a refusnik and joined the Human rights movement, along with two other prominent physicists, Andrei Sakharov and Yuri Orlov. To earn his living, he had to do manual work, repeatedly being intimidated by KGB. Only 18 years later, shortly before the demise of the Soviet Union, did he obtain permission to leave the country, emigrating to Israel in 1990.

These personal life stories of two outstanding theorists are intertwined with the tragedies of the 20th century and make for compelling reading.

Readership: Students, teachers, physicists and historians of science interested in the dramatic events of the 20th century events.

From reader reviews:

Donna Gray:

The book untitled Physics in a Mad World is the reserve that recommended to you to study. You can see the quality of the book content that will be shown to a person. The language that author use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, therefore the information that they share to you personally is absolutely accurate. You also will get the e-book of Physics in a Mad World from the publisher to make you considerably more enjoy free time.

Juan Higgins:

The reserve with title Physics in a Mad World has lot of information that you can find out it. You can get a lot of help after read this book. This kind of book exist new understanding the information that exist in this guide represented the condition of the world today. That is important to yo7u to be aware of how the improvement of the world. That book will bring you in new era of the globalization. You can read the e-book on your smart phone, so you can read it anywhere you want.

Kay Newberry:

Your reading sixth sense will not betray you actually, why because this Physics in a Mad World guide written by well-known writer who really knows well how to make book that could be understand by anyone who also read the book. Written within good manner for you, still dripping wet every ideas and composing skill only for eliminate your own hunger then you still hesitation Physics in a Mad World as good book not only by the cover but also with the content. This is one publication that can break don't ascertain book by its cover, so do you still needing an additional sixth sense to pick this particular!?! Oh come on your examining sixth sense already alerted you so why you have to listening to one more sixth sense.

Judy Marinez:

Is it an individual who having spare time subsequently spend it whole day through watching television programs or just resting on the bed? Do you need something new? This Physics in a Mad World can be the answer, oh how comes? The new book you know. You are consequently out of date, spending your extra time by reading in this new era is common not a geek activity. So what these guides have than the others?
