# Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing)

*Verena Rieser, Oliver Lemon*

**Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing)** Verena Rieser, Oliver Lemon

The past decade has seen a revolution in the field of spoken dialogue systems. As in other areas of Computer Science and Artificial Intelligence, data-driven methods are now being used to drive new methodologies for system development and evaluation.

This book is a unique contribution to that ongoing change. A new methodology for developing spoken dialogue systems is described in detail. The journey starts and ends with human behaviour in interaction, and explores methods for learning from the data, for building simulation environments for training and testing systems, and for evaluating the results. The detailed material covers: Spoken and Multimodal dialogue systems, Wizard-of-Oz data collection, User Simulation methods, Reinforcement Learning, and Evaluation methodologies.

The book is a research guide for students and researchers with a background in Computer Science, AI, or Machine Learning. It navigates through a detailed case study in data-driven methods for development and evaluation of spoken dialogue systems. Common challenges associated with this approach are discussed and example solutions are provided. This work provides insights, lessons, and inspiration for future research and development – not only for spoken dialogue systems in particular, but for data-driven approaches to human-machine interaction in general.

**From reader reviews:**

**Betty Hood:**

The book Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing) give you a sense of feeling enjoy for your spare time. You should use to make your capable considerably more increase. Book can for being your best friend when you getting stress or having big problem with the subject. If you can make studying a book Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing) for being your habit, you can get more advantages, like add your own capable, increase your knowledge about many or all subjects. You are able to know everything if you like start and read a reserve Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing). Kinds of book are a lot of. It means that, science book or encyclopedia or some others. So , how do you think about this guide?

**Antonette Schneider:**

Spent a free the perfect time to be fun activity to do! A lot of people spent their free time with their family, or their own friends. Usually they undertaking activity like watching television, likely to beach, or picnic inside park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Might be reading a book could be option to fill your free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the reserve untitled Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing) can be great book to read. May be it may be best activity to you.

**Alberto Turcotte:**

Are you kind of occupied person, only have 10 or perhaps 15 minute in your day time to upgrading your mind skill or thinking skill also analytical thinking? Then you are having problem with the book when compared with can satisfy your short period of time to read it because this time you only find e-book that need more time to be examine. Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing) can be your answer given it can be read by you actually who have those short spare time problems.

**Rebecca Goza:**

Beside this kind of Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing) in your phone, it might give you a way to get nearer to the new knowledge or facts. The information and the knowledge you are going to get here is fresh through the oven so don't always be worry if you feel like an aged people live in narrow small town. It is good thing to have Reinforcement Learning for Adaptive Dialogue Systems: A Data-driven Methodology for Dialogue Management and Natural Language Generation (Theory and Applications of Natural Language Processing) because this book offers for you readable information. Do you occasionally have book but you seldom get what it's interesting features of. Oh come on, that will not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, just like treasuring beautiful island. Use you still want to miss the idea? Find this book as well as read it from today!
