The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

Identifying some of the most influential algorithms that are widely used in the data mining community, **The Top Ten Algorithms in Data Mining** provides a description of each algorithm, discusses its impact, and reviews current and future research. Thoroughly evaluated by independent reviewers, each chapter focuses on a particular algorithm and is written by either the original authors of the algorithm or world-class researchers who have extensively studied the respective algorithm.

The book concentrates on the following important algorithms: C4.5, k -Means, SVM, Apriori, EM, PageRank, AdaBoost, k NN, Naive Bayes, and CART. Examples illustrate how each algorithm works and highlight its overall performance in a real-world application. The text covers key topics—including classification, clustering, statistical learning, association analysis, and link mining—in data mining research and development as well as in data mining, machine learning, and artificial intelligence courses.

By naming the leading algorithms in this field, this book encourages the use of data mining techniques in a broader realm of real-world applications. It should inspire more data mining researchers to further explore the impact and novel research issues of these algorithms.

From reader reviews:

Timothy Rocha:

Do you among people who can't read pleasant if the sentence chained in the straightway, hold on guys that aren't like that. This The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) book is readable through you who hate the perfect word style. You will find the data here are arrange for enjoyable reading through experience without leaving even decrease the knowledge that want to offer to you. The writer involving The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) content conveys prospect easily to understand by many people. The printed and e-book are not different in the content but it just different such as it. So , do you still thinking The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is not loveable to be your top checklist reading book?

Bertram Staten:

The e-book untitled The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is the book that recommended to you to read. You can see the quality of the book content that will be shown to a person. The language that publisher use to explained their ideas are easily to understand. The author was did a lot of research when write the book, so the information that they share to your account is absolutely accurate. You also will get the e-book of The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) from the publisher to make you a lot more enjoy free time.

Randy Jones:

Your reading sixth sense will not betray anyone, why because this The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) e-book written by well-known writer we are excited for well how to make book which might be understand by anyone who read the book. Written with good manner for you, still dripping wet every ideas and creating skill only for eliminate your own personal hunger then you still hesitation The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) as good book not merely by the cover but also with the content. This is one guide that can break don't determine book by its cover, so do you still needing another sixth sense to pick that!? Oh come on your reading through sixth sense already alerted you so why you have to listening to one more sixth sense.

Sandra Forester:

What is your hobby? Have you heard that will question when you got pupils? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person such as reading or as studying become their hobby. You need to know that reading is very important and also book as to be the thing. Book is important thing to increase you knowledge, except

your own personal teacher or lecturer. You see good news or update with regards to something by book. Amount types of books that can you go onto be your object. One of them is niagra The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series).
