Creo Parametric 1.0 for Designers

Prof. Sham Tickoo Purdue Univ. and CADCIM Technologies

Creo Parametric 1.0 for Designers Prof. Sham Tickoo Purdue Univ. and CADCIM Technologies

Creo Parametric 1.0 for Designers is a comprehensive textbook that introduces the users to Creo Parametric 1.0, a feature-based 3D parametric solid modeling software. The textbook covers all major environments of Creo Parametric 1.0 with a thorough explanation of all tools, options, and their applications to create real-world products. About 60 mechanical engineering industry examples are used as tutorials and an additional 40 as exercises to ensure that the users can relate their knowledge and understand the design techniques used in the industry.

After reading the textbook, the users will be able to create parts and assemblies, and then render them, create drawing views with bill of materials, and learn the editing techniques that are essential to make a successful design. Also, the surfacing techniques like Style and Freestyle are discussed in this book.

Salient Features of the Textbook

Consists of 16 pedagogical sequenced chapters covering the Sketching, Modeling, Assembly, Drafting, Surfacing, and Sheet Metal environments of Creo Parametric 1.0.

The first page of every chapter summarizes the topics that will be covered in it.

#Real-world projects and examples focusing on industry experience.

#Step-by-step examples that guide the users through the learning process.

#Additional information is provided throughout the textbook in the form of tips and notes.

#Self-Evaluation test and review questions are provided at the end of each chapter so that the users can assess their knowledge.

Free Teaching and Learning Resources CADCIM Technologies provides the following Free Teaching and Learning Resources with this textbook:

Technical support

#Drawing files of the models used in illustrations, examples, and exercises

#Customizable PowerPoint presentations of every chapter in this textbook

#Instructor's guide that provides solutions to review questions and exercises

#Student projects to enhance the skills

About the Author

CADCIM Technologies, Prof. Sham Tickoo of Purdue University Calumet, and the team of dedicated contributing authors are committed to bring you the best textbooks and free teaching and learning resources on Computer Aided Design and Manufacturing (CAD/CAM), Computer Programming and Applications, GIS, Civil, Animation, and related technologies. We strive to be the first and the best. That is our promise

and our goal.

Our team of authors consists of highly qualified and experienced Professionals who have a strong academic and industrial background. They understand the needs of the students, the faculty, and the challenges the students face when they start working in industry. All our textbooks have been structured in a way that facilitates teaching and learning, and also exposes students to real-world applications. The textbooks, apart from providing comprehensive study material, are well appreciated for the simplicity of content, clarity of style, and the in-depth coverage of the subject.

From reader reviews:

Lisa Cook:

A lot of people always spent all their free time to vacation as well as go to the outside with them family or their friend. Are you aware? Many a lot of people spent they free time just watching TV, as well as playing video games all day long. In order to try to find a new activity this is look different you can read any book. It is really fun for you. If you enjoy the book that you simply read you can spent all day long to reading a reserve. The book Creo Parametric 1.0 for Designers it is quite good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. When you did not have enough space to deliver this book you can buy often the e-book. You can m0ore effortlessly to read this book from the smart phone. The price is not very costly but this book possesses high quality.

Matthew Sammons:

People live in this new day of lifestyle always make an effort to and must have the free time or they will get large amount of stress from both everyday life and work. So , when we ask do people have spare time, we will say absolutely yes. People is human not only a robot. Then we question again, what kind of activity do you have when the spare time coming to anyone of course your answer may unlimited right. Then do you ever try this one, reading guides. It can be your alternative within spending your spare time, typically the book you have read will be Creo Parametric 1.0 for Designers.

Walter Knight:

Reading a book to get new life style in this yr; every people loves to go through a book. When you study a book you can get a large amount of benefit. When you read publications, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your examine, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these us novel, comics, along with soon. The Creo Parametric 1.0 for Designers offer you a new experience in reading through a book.

Isaac Lewis:

As we know that book is significant thing to add our information for everything. By a publication we can know everything you want. A book is a list of written, printed, illustrated or blank sheet. Every year has been exactly added. This reserve Creo Parametric 1.0 for Designers was filled regarding science. Spend your free time to add your knowledge about your technology competence. Some people has distinct feel when they reading a new book. If you know how big benefit of a book, you can truly feel enjoy to read a e-book. In the modern era like at this point, many ways to get book that you just wanted.
