## Advanced Membrane Technology and Applications

Advanced membranes-from fundamentals and membrane chemistry to manufacturing and applications

A hands-on reference for practicing professionals, *Advanced Membrane Technology and Applications* covers the fundamental principles and theories of separation and purification by membranes, the important membrane processes and systems, and major industrial applications. It goes far beyond the basics to address the formulation and industrial manufacture of membranes and applications.

This practical guide:

- Includes coverage of all the major types of membranes: ultrafiltration; microfiltration; nanofiltration; reverse osmosis (including the recent high-flux and low-pressure membranes and anti-fouling membranes); membranes for gas separations; and membranes for fuel cell uses
- Addresses six major topics: membranes and applications in water and wastewater; membranes for biotechnology and chemical/biomedical applications; gas separations; membrane contractors and reactors; environmental and energy applications; and membrane materials and characterization
- Includes discussions of important strategic issues and the future of membrane technology

With chapters contributed by leading experts in their specific areas and a practical focus, this is the definitive reference for professionals in industrial manufacturing and separations and research and development; practitioners in the manufacture and applications of membranes; scientists in water treatment, pharmaceutical, food, and fuel cell processing industries; process engineers; and others. It is also an excellent resource for researchers in industry and academia and graduate students taking courses in separations and membranes and related fields.

### From reader reviews:

#### **Jerry Carley:**

The particular book Advanced Membrane Technology and Applications has a lot of knowledge on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. Mcdougal makes some research just before write this book. That book very easy to read you can find the point easily after reading this book.

#### **Victor Smith:**

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you could have it in e-book way, more simple and reachable. This particular Advanced Membrane Technology and Applications can give you a lot of close friends because by you taking a look at this one book you have matter that they don't and make an individual more like an interesting person. This kind of book can be one of a step for you to get success. This publication offer you information that maybe your friend doesn't understand, by knowing more than different make you to be great individuals. So , why hesitate? We need to have Advanced Membrane Technology and Applications.

#### **Francisco Garcia:**

As we know that book is important thing to add our knowledge for everything. By a e-book we can know everything we really wish for. A book is a list of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This reserve Advanced Membrane Technology and Applications was filled in relation to science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading a book. If you know how big selling point of a book, you can feel enjoy to read a book. In the modern era like now, many ways to get book you wanted.

#### **John Lyons:**

A number of people said that they feel uninterested when they reading a publication. They are directly felt that when they get a half portions of the book. You can choose typically the book Advanced Membrane Technology and Applications to make your own reading is interesting. Your current skill of reading proficiency is developing when you like reading. Try to choose very simple book to make you enjoy to study it and mingle the sensation about book and reading through especially. It is to be initial opinion for you to like to start a book and learn it. Beside that the e-book Advanced Membrane Technology and Applications can to be your brand new friend when you're experience alone and confuse in doing what must you're doing of this time.
