Template Matching Techniques in Computer Vision: Theory and Practice

Roberto Brunelli

Template Matching Techniques in Computer Vision: Theory and Practice Roberto Brunelli The detection and recognition of objects in images is a key research topic in the computer vision community. Within this area, face recognition and interpretation has attracted increasing attention owing to the possibility of unveiling human perception mechanisms, and for the development of practical biometric systems. This book and the accompanying website, focus on template matching, a subset of object recognition techniques of wide applicability, which has proved to be particularly effective for face recognition applications. Using examples from face processing tasks throughout the book to illustrate more general object recognition approaches, Roberto Brunelli:

- examines the basics of digital image formation, highlighting points critical to the task of template matching;
- presents basic and advanced template matching techniques, targeting grey-level images, shapes and point sets;
- discusses recent pattern classification paradigms from a template matching perspective;
- illustrates the development of a real face recognition system;
- explores the use of advanced computer graphics techniques in the development of computer vision algorithms.

Template Matching Techniques in Computer Vision is primarily aimed at practitioners working on the development of systems for effective object recognition such as biometrics, robot navigation, multimedia retrieval and landmark detection. It is also of interest to graduate students undertaking studies in these areas.

Gerald Toups:

The feeling that you get from Template Matching Techniques in Computer Vision: Theory and Practice will be the more deep you digging the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to be aware of but Template Matching Techniques in Computer Vision: Theory and Practice giving you joy feeling of reading. The author conveys their point in selected way that can be understood by means of anyone who read this because the author of this publication is well-known enough. This specific book also makes your own vocabulary increase well. So it is easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this kind of Template Matching Techniques in Computer Vision: Theory and Practice instantly.

Paul Green:

Reading a book tends to be new life style in this era globalization. With examining you can get a lot of information that can give you benefit in your life. Together with book everyone in this world may share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story or maybe their experience. Not only the storyplot that share in the textbooks. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors nowadays always try to improve their skill in writing, they also doing some study before they write to the book. One of them is this Template Matching Techniques in Computer Vision: Theory and Practice.

Ashley Wright:

A lot of people always spent their own free time to vacation or go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you would like try to find a new activity honestly, that is look different you can read any book. It is really fun for you. If you enjoy the book which you read you can spent the entire day to reading a guide. The book Template Matching Techniques in Computer Vision: Theory and Practice it is extremely good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. If you did not have enough space to develop this book you can buy the actual e-book. You can m0ore simply to read this book out of your smart phone. The price is not to fund but this book provides high quality.

Cory Thomas:

Your reading sixth sense will not betray you actually, why because this Template Matching Techniques in Computer Vision: Theory and Practice book written by well-known writer we are excited for well how to make book which can be understand by anyone who read the book. Written within good manner for you, still

dripping wet every ideas and creating skill only for eliminate your own hunger then you still skepticism Template Matching Techniques in Computer Vision: Theory and Practice as good book not only by the cover but also through the content. This is one reserve that can break don't judge book by its include, so do you still needing an additional sixth sense to pick this specific!? Oh come on your looking at sixth sense already told you so why you have to listening to one more sixth sense.
