Atlas and Dissection Guide for Comparative Anatomy Saul Wischnitzer

For laboratory courses in comparative vertebrate anatomy, Dr. Wischnitzer's atlas/ dissection guide has offered a peerless combination of illustrations, text, and design for over twenty-five years. The Fifth Edition expands on that tradition. Atlas and dissection Guide for Comparative Anatomy, Fifth Edition offers an exceptional introduction to the anatomy of the amphioxus, tunicate, acorn worm, lamprey, dogfish shark, mud puppy, and cat. The hallmarks of previous editions are here: highquality two- and three dimensional illustrations,(some in colour); meticulous labelling; precise text facing the corresponding diagram; and easy-to-follow instruction. The flexible organization of the book is also retained: animal forms are covered in sequence, but with each body system examined in a single self-contained exercise, the book adapts easily to a comparative approach.
