Energy and the Environment (MIT-Pappalardo Series in Mechanical Engineering) James A. Fay, Dan S. Golomb

In an age of mounting energy crises, James A. Fay and Dan S. Golomb's *Energy and the Environment* offers a timely treatment of a critical problem in urban-industrial societies: the worldwide growth of energy use and the destructive relationship between this energy use and environmental degradation. This comprehensive text provides the scientific and technological background for understanding how our ever-increasing use of energy threatens the natural environment at local, regional, and global scales and how this threat could be mitigated by more efficient use of conventional energy sources and their replacement by renewable energy sources. Designed for upper-level undergraduate and first-year graduate students, Energy and the Environment is essential reading for students and professionals in energy and environmental sciences and technology.

#### **Features**

- · Describes energy technologies and their effectiveness in transforming fossil, nuclear, and renewable energy into useful mechanical or electrical power
- · Emphasizes the generation of electric power and the technological improvements that increase power generation efficiency and reduce air pollutant emissions from power plants
- · Examines the use of energy in the transportation sector and how vehicle design and engine efficiency improvements could reduce fuel use and pollutant emissions
- · Objectively surveys the field of renewable energy technologies and the prospects of increasing the share of renewable energy among all energy sources
- · Analyzes the energy sources of toxic emissions to air, water, and land and their effects on environmental quality at local and regional scales
- · Examines global climate change, energy consumption's contribution to it, and the salient technologies being developed to mitigate this effect
- · Equips engineering majors, science majors, and professionals with the basic facts needed to develop solutions to these pressing environmental problems

#### From reader reviews:

#### **Donald Andrews:**

Nowadays reading books become more than want or need but also turn into a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want attract knowledge just go with schooling books but if you want feel happy read one with theme for entertaining such as comic or novel. The particular Energy and the Environment (MIT-Pappalardo Series in Mechanical Engineering) is kind of e-book which is giving the reader unpredictable experience.

#### **Cody Smith:**

Information is provisions for anyone to get better life, information these days can get by anyone with everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider while those information which is inside the former life are challenging be find than now could be taking seriously which one is acceptable to believe or which one the resource are convinced. If you obtain the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen throughout you if you take Energy and the Environment (MIT-Pappalardo Series in Mechanical Engineering) as the daily resource information.

#### **Ruth Aguilar:**

Often the book Energy and the Environment (MIT-Pappalardo Series in Mechanical Engineering) has a lot associated with on it. So when you make sure to read this book you can get a lot of benefit. The book was compiled by the very famous author. Mcdougal makes some research previous to write this book. This specific book very easy to read you can find the point easily after reading this article book.

#### **Armando Lemaire:**

E-book is one of source of know-how. We can add our know-how from it. Not only for students but also native or citizen want book to know the upgrade information of year to help year. As we know those guides have many advantages. Beside all of us add our knowledge, could also bring us to around the world. With the book Energy and the Environment (MIT-Pappalardo Series in Mechanical Engineering) we can acquire more advantage. Don't you to be creative people? Being creative person must love to read a book. Simply choose the best book that suited with your aim. Don't end up being doubt to change your life at this book Energy and the Environment (MIT-Pappalardo Series in Mechanical Engineering). You can more pleasing than now.
